To whom it may concern:

I wish to address my concerns related to the Tom Dobbie case concerning his children Aurora and Orion.

I am a Guardian ad Litem of the 5th Circuit and have been a court appointed advocate for many years.

I have read all documents pertaining to this case. There is clear and convincing evidence concerning these two children and what has happened to them. It is clearly being overlooked in this case.

The documents show that this was technically a rape along with a sexualized incident. The child Thomas clearly shows sexualized predatory behaviors. He was well known for these aggressive behaviors and was getting psychiatric counseling along with having a social worker assigned to him. The supervisory parent was extremely negligent in not protecting the children.

I have seen the video evidence concerning Aurora and Orion. It is a clear case of child abuse concerning both of these children and very troubling. This must be taken into consideration for this case.

I have viewed the document by Helen Jones, clearly it was a cover up and not in the best interest of the children. She protected the abuser not the abused. This is not acceptable and unprofessional on any level. They are minor children and the parties involved should do what is best for the abused and view the case without prejudice.

I will gladly give this statement as a sworn affidavit should it be needed. This email may be used for my verification and further proof of my identity can be given. Please consider my words and give these children the justice they so deserve. Thank you for your attention.

Yours faithfully,

--
